

# Preventive care medications

**\$0 cost share medications & products**<sup>1,2,3,5</sup>

Effective Jan. 1, 2023

Under the health reform law (Affordable Care Act), benefit plans must cover certain Preventive Care Medications at 100% – without charging a copay, coinsurance or deductible.

These products include:

- U.S. Preventive Services Task Force A & B Recommendation medications
- Food and Drug Administration (FDA)-approved prescription and over-the-counter (OTC) birth control (contraceptives).
- Flu shot and other vaccines

In support of this law, Optum Rx is offering this updated list of no-cost Preventive Care Medications.

You can use your Optum Rx member ID card to get the products on this list for no cost if they are:

- Prescribed by a health care professional
- Age- and condition-appropriate
- Filled at a network pharmacy

To find a network pharmacy, log on to [optumrx.com](https://www.optumrx.com), select “Pharmacy Locator” on the right hand side of the screen and enter your zip code or call the number on your Optum Rx member ID card. If you get these medications or products from an out-of-network pharmacy, you may have to pay the full cost for them.

# Frequently asked questions

## Preventive Care Medications Coverage

### What Preventive Care Medications are available at no cost?

Look at the list in this document, log on to [optumrx.com](http://optumrx.com), or call the number on your Optum Rx member ID card for a list of medications covered at \$0 cost share.

Please note, in order to get coverage at no cost for preventive care medications and products (including over-the-counter) you will need a prescription from your doctor.

### What happens if a generic medication becomes available?

Prescription brand products may be replaced by newly launched FDA approved generic equivalents.

### What if my doctor says I need a birth control product that is not on this list?

This list includes at least one form of birth control from each category of FDA-approved, -cleared and -granted contraceptives typically available through your pharmacy benefit. If your doctor prescribes birth control not on our list that is medically necessary, Optum Rx will cover that recommended drug or product at no cost to you through our 'Health Care Reform' copay waiver review process. Just call the number on your Optum Rx member ID card, and ask how to get coverage.

Some methods of birth control, such as IUDs and implants, may be available through your **medical benefit** and not your pharmacy benefit.

### Is my plan required to cover contraceptives?

Some plans may not have coverage for contraceptives if your employer elects a religious or moral exemption. Also, for employers who elect a religious or moral accommodation, Optum Rx may provide or arrange for separate contraceptive coverage for those employers' members as allowed by the health reform law.

### If I'm at risk for preeclampsia during pregnancy, how can I get low-dose aspirin for no cost?

Low-dose or baby aspirin (81 mg) is available at no cost to pregnant women at risk for preeclampsia. If you are pregnant and at risk for preeclampsia, talk to your doctor about whether low-dose aspirin can help. If so, your doctor can give you a prescription for low-dose aspirin which can be filled at no cost to you at a network retail pharmacy.

### If I need to take preparation medications before a preventive colonoscopy, how can I get these for no cost?

If you are scheduled for a preventive colonoscopy, ask your doctor for a prescription for one of the no cost preparation medications. You can fill this prescription at a retail network pharmacy at no cost to you. Note: There is a limit of two \$0-cost fill per year.

### What if my doctor prescribes a preparation medication for my preventive colonoscopy that is not on this list?

You can ask your doctor for a prescription for one of the medications on this list that your doctor feels would work for you. For some medical reasons, your doctor may decide you need a medication that is not on this list to prepare for your preventive colonoscopy. If so, you can request the medication you need by calling the number on your member ID card, and asking how to get coverage at no cost.

If you need a prescription medication to prepare for a colonoscopy that is **not preventive**, these medications may still be covered with a copayment or coinsurance.

### How can I get preventive medications to help me stop using tobacco for no cost?

If you are age 18 or older and want to quit using tobacco products, talk to your doctor about medications that can help. If your doctor decides this therapy is right for you, they may prescribe a generic over-the-counter or prescription medication.

The tobacco cessation products on this list are available at no cost to you if they are:

- Prescribed by your doctor
- Filled at a network pharmacy
- Meet use and quantity guidelines

### If I'm at risk for HIV (Human Immunodeficiency Virus) but have not been infected, how can I get preventive drugs for \$0 cost share?

If you are a member not yet infected with HIV, talk to your doctor about your risk of getting HIV. If your doctor decides this treatment is appropriate for you, your doctor may offer to prescribe risk-reducing medications, such as emtricitabine-tenofovir disoproxil fumarate 200-300mg, tenofovir 300mg tablet or Descovy. Your doctor must submit a 'Health Care Reform' copay waiver review form to request \$0 cost share if you meet the coverage criteria.

## Frequently asked questions continued

### What if my doctor says I need an HIV PrEP medication that is not on this list?

If your doctor prescribes an HIV PrEP medication not on our list for medical reasons, Optum Rx will cover that recommended drug at no cost to you through our 'Health Care Reform' copay waiver review process. Just call the number on your Optum Rx member ID card, and ask how to get coverage.

### If I'm at risk for breast cancer but have not had it, how can I get preventive drugs for \$0 cost share?

If you are a member age 35 or older, talk to your doctor about your risk of getting breast cancer if you have not had it. If your doctor decides this treatment is appropriate for you, your doctor may offer to prescribe risk-reducing medications, such as raloxifene or tamoxifen. Your doctor must submit a 'Health Care Reform' copay waiver review form to request \$0 cost share if you meet the coverage criteria.

### If I'm at risk for cardiovascular disease, how can I get statin medications at no cost to me?

If you are a member age 40-75, and at risk for cardiovascular disease, your doctor may offer to prescribe statin medications. Select statins are covered at no cost share for people who have certain risk factors for cardiovascular disease. Depending on the medication, your doctor may need to submit a 'Health Care Reform' copay waiver review form to request \$0 cost share if you meet coverage criteria.

### Will this drug list change?

Drug lists can and do change, so it's always good to check. You can find the most updated information by:

- Logging in to [optumrx.com](https://optumrx.com), or
- Calling the number on your Optum Rx member ID card.

### Are the no cost Preventive Care Medications available at both retail and home delivery pharmacies?

Preventive Care Medications are available at network retail pharmacies. Most are also available at the Optum Rx® Home Delivery Pharmacy for plans with a home delivery benefit. For example, the Optum Rx Home Delivery Pharmacy can mail a 3-month supply of your medication right to you with no cost for standard shipping. That means you can order 4 times a year instead of making 12 trips to pick up your medication. To start using home delivery, just call the number on your Optum Rx member ID card.

### What if the health care reform law requirements for Preventive Care Medication coverage change?

If the law requiring plans to provide preventive care medications at no cost changes, information on how your costs may change will be available to you by:

- Logging in to [optumrx.com](https://optumrx.com), or
- Calling the number on your Optum Rx member ID card.

1. Please note this list is subject to change.
2. Always refer to your benefit plan materials to determine your coverage for medications and cost share. Some medications may not be covered under your specific benefit. Where differences are noted, the benefit plan documents will govern.
3. All branded medications are trademarks or registered trademarks of their respective owners.
4. The listed age limits are based on U.S. Preventive Services Task Force Recommendations; coverage for additional populations may also apply as required.
5. If your pharmacy benefit plan is grandfathered under the ACA, these drugs may be covered at the normal cost share.
6. Not all vaccines on this list are available at all participating pharmacies. Members should contact their participating pharmacy of choice to confirm vaccine availability.

2300 Main Street, Irvine, CA 92614
